Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 29-30 and 32-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Ito et al.

Regarding claims 28, 34, Ito et al., discloses a rotor assembly with features of the claimed invention including a first and a second stator, being parallel to each other and having plurality of teeth, a retaining member is holding the stators. (See claim 1).

Regarding claim 29, the stator including circular base.

Regarding claim 30, the retaining member (element 6h) substantially enclosing the stators)

Regarding claims 32-33, the teeth can be in phase or out of phase in different times.

3. Claims 31 and 35-37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 1-27, and 37-46 are allowed.

Art Unit: 2855

5. The following is an examiner's statement of reasons for allowance: The primary reason for allowance of the claims is that prior art neither teach nor fairly suggest the particular combination of the apparatus for measuring the relative displacement between two shafts. Major emphasis regarding claim 1, is being placed upon the provision of "*rotor assembly having two stators, and a sensor placed in gap between the stators plate surfaces*" and regarding claim 37 is placed upon the provision of a rotor having inner and outer surfaces such that "*the inner radius being larger than outer radius*" in combination with other limitations of the said claims and their dependent ones.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

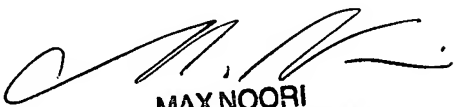

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Max H. Noori whose telephone number is (571) 272-2185. The examiner can normally be reached on Tuesday-Friday from 8:00 AM to 6:00 PM.
